Endodontics : The Utmost Values in Dentistry

Masterclass by Dentsply Sirona

Title	Featuring Gold Glider & WaveOne Gold
Speaker	Cliff Ruddle Advanced Endodontics® , USA
Date & Time	Oct. 4 (Thu), 15:00-17:00
Place	Hall E2 (3F)

****Maximum number of Attendees: 100**

Course Description:

The most recent advances in canal preparation methods have focused on the concept that "less is more."

Dr. Ruddle will describe a state-of-the-art single-file method for glide path management and shaping canals, regardless of their length, diameter, and curvature. Emphasis will be on how the convergence of file design, heat treatment technology, and a unique movement significantly improve safety, efficiency, and simplicity when shaping canals. Well-prepared canals promote 3-D disinfection and filling root canal systems.

Course Objectives:

At conclusion, participants should be able to:

- 1) Identify the biological and mechanical objectives for preparing canals.
- 2) Understand how file design, metallurgy, and movement influence shaping results.
- 3) Appreciate how performance inspires confidence, fun, and results.
